GAT
Global Asset Tracking

Tank monitoring units

How a GAT unit reports tank level and location from remote and mobile sites

4G + satellite
selected automatically

Daily
tank level reports

How a unit works

1 Measure

A sensor measures the fluid level in the tank.

2 Locate

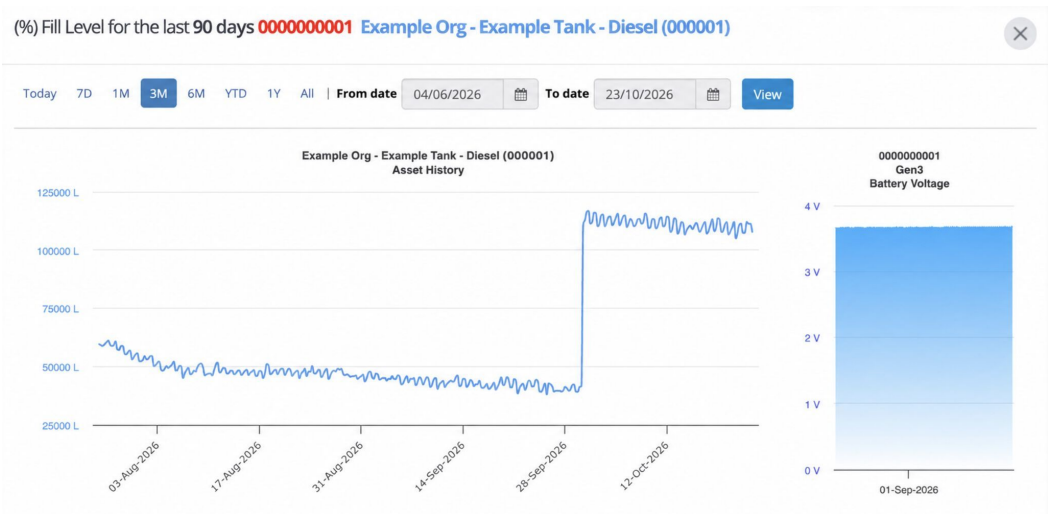

The unit reports its GPS location, which matters most for mobile tanks.

3 Connect

The unit selects between 4G and satellite automatically, so remote sites are not a barrier.

4 Report

Readings are delivered through LevelTrack, with a daily level report sent by email. Our support team is on hand if you need help.

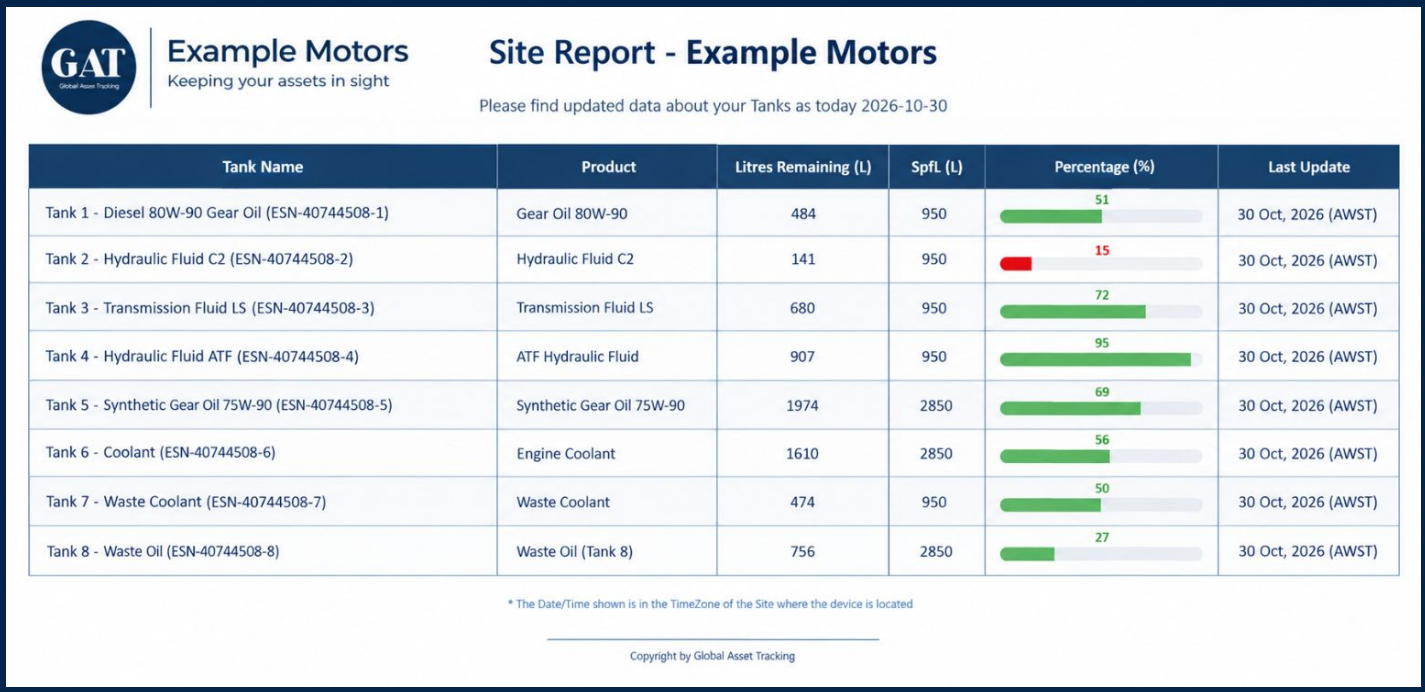

Specifications

Item	Detail
Measures	Tank fluid level and GPS location
Tank types	Fixed and mobile tanks
Connectivity	Automatic selection between 4G and satellite
Reporting	LevelTrack platform, with a daily level report by email
Sensor type	Submersible pressure sensor
Tank compatibility	Any tank, any size
Power	Battery powered, 7 year battery life
Protection rating	IP68
Operating range	-20 to +80°C
Support	Dedicated, trained team: live chat in business hours, email replies within one business day, phone lines always open
